

User Stories

My app is a clone of twitter.

1. As a user I need to be able to follow users so that I can get updates on them.
2. As a user I need to be notified when people I follow make posts so I can see them right away.
3. As a user I need to be able to disable all notifications so I can avoid distractions.
4. As a user I need to be able to login using my google account so I don't have to create another account for twitter.
5. As a creator I need to be able to post video content so I can share my creations.
